

High School Meet at M. A. C.

In awarding the annual interscholastic track and field meet to M. A. C., the schoolmasters' association made a good choice, for the M. A. C. field is perhaps better fitted for such a big meet than any other in this part of the state. There is a large bath house which may be used by two-score athletes at a time and other advantages. The athletic management of the college plans on making a few improvements and it is probable that the 100-yard straightaway will be lengthened so that the boys can run 220 yards without a turn. If this is done it will mean that some better marks will be made.

All high schools that are members of the Interscholastic association are eligible to compete.

MAC plans 3-20-1913
