**NOW
YOU CAN HAVE A
GRASSTEX®
ALL-WEATHER TRACK
IN...**

It has been about five years since Grasstex took "weather worries" out of track by providing a smooth, true, resilient surface that was always available, for both practice and competition.

Grasstex also eliminated high maintenance costs, and did away with the raking, watering and re-lining that used to hamper the orderly conduct of every meet.

Now, Grasstex gives something to track, adding color to the running surface. Color gives a new dimension to the spectator appeal of the sport. You can now specify your new Grasstex Track in red or green in place of the conventional black.

If you are planning a new track installation or major reconditioning of an existing track, call the Laykold/Grasstex Engineer in our nearest office. In addition to supplying all the answers on the new color tracks, he can help you compute a factual "pay-out program" for your job, based on reduced maintenance costs.
