

US REPORT MARKS RECEIVED TO MAY 25

This will be the final Outdoor Report until after the Munich Games as I will be leaving for foreign shores soon and will not return until after the Games (see Real Talk). The pace has quickened in the US and already national records have tumbled or are threatened. It promises to be a great season with the National Championships and the Olympic Trials highlighting the local affairs. Our dual meet with Canada will help sharpen our talents as we go into the Games as the "defending champions" from 1968.

All marks are verified and have reached this office by May 25. Athletes not eligible to compete for spots on the USA Olympic team are marked with an #. *-Converted from meters.

100y/100m (Olympic qualifying marks 10.6/11.5)

The top sprinters have been meeting each other very seldom so far this season. Iris Davis has the US supporters a little worried - she looked fantastic in the 4x110 relay at the King Games and a few minutes later looked terrible in the 100m sprint finishing third. Interesting to note is the fact we have seven sprinters who have clocked 10.5 - and all were made either in a qualifying heat or a semi-final! We have five more sprinters who have been credited with 10.6 - and only one was made in a final. I'm not certain of the significance of this point, but it seems to be trying to tell us something!
