It was a long, but, I feel, successful meet which should have done something to stimulate track at the schools which competed. I still feel that some coaches are loading the track with warm bodies, especially in the 60 and distance events. I can't see that it does anyone any good to get lapped or beaten badly. This sort of meet shouldn't be a time trial. Also it shouldn't be for fellows who are not in shape, for beginners, or for low-ability athletes. Sheer numbers will kill meets such as this. There is a limit and we are getting close to it. Much thanks to all who helped in running off the meet by officiating or in helping in any number of ways. Special thanks to the world's greatest clerk, Kermit Ambrose; starter Bob Bleomer; announcer & USITT representative Carl Krieger. I thought it clicked right along & with the number of entries, our time schedule was unrealistic, but we did the best we could.

Perhaps some thought should be given to alternative plans for winter running activity. Road runs are fun and you can clock your men just as easily as on a small indoor track where it is very crowded. They can be run in any kind of weather. Much of the time the weather is nice enough to run outdoor meets on all-weather tracks. This is done a lot in NY and NJ. There are at least 50 high schools with indoor tracks. They may not be as nice or as big as the college tracks but they could be used for eliminations or for limited competition. There must be armories, warehouses, etc. some place that could be used. These are used extensively out east. The championship events could be saved for the college field houses which are vastly over-taxed as it is with girls sports, basketball, wrestling, gymnastics, football, baseball, track, golf, tennis, intramurals all fighting to use one area. It gets wild needless to say. The facilities in NY & NJ are no more frequent or better than those here, but they have full HIGH SCHOOL indoor schedules. This brings up a further point--coaches who do not accompany their squads; post-grad. students; over-age, etc. sort of defeat the purpose. Also vaulters trying to clear 12 feet who can't make 8'0" is ridiculous as are the kids who try to outguess (but never succeed) the starter (this isn't good coaching).

Another idea for indoor competition would be for meets in the gym (pursuit races) or in the halls. Ingenuity can come up with all sorts of ideas for this type of thing. They don't have to run personal bests every time they run. Competition is the thing. Actually hitting a very fast time indoors under virtually ideal conditions might be demoralizing when the kid fails to equal it again over or very late in the season outdoors. At least that is the way it works with our kids on the college level.

Good luck to everyone with their squads. It looks like another good year in Michigan High School track. Keep up the good work & send some good kids to us here at MIU.
