Novi's Toloff grabbed second. (Ted Nykiel photo)

The Lower Peninsula State Meet was held at Brooklyn's Michigan International Speedway on November 4. Ideal conditions greeted the athletes, and the running surface has never been in better shape. Minor changes in the course after the two-mile mark resulted in the elimination of a hill on the course, making the race's final mile—which has always had a net downhill slope—even faster.

The timing of the races was done by means of the "chip", a device attached to the runners' shoelaces, which recorded the runners' times automatically every time they crossed a timing pad. Pads at 1M, 2M, 3M and the finish guaranteed accurate splits throughout.

The times here...As explained elsewhere, the policy used in this book is to round all cross country times up to the nearest whole second. In the records section, that of course will be done with these state meet times. However, since the chip timing does provide a very accurate accounting of the margins between runners at the finish of the race, times to the tenth will be provided in these results, for curiosity's sake, if nothing else.

An asterisk (\*) before an athlete's name means that school did not have a full team in the race and that athlete's position did not affect the team scoring.
