2000 Boys State Finals

These state final results differ from the official MHSAA results in several important respects. Most importantly, all known results are published here, not just the top 8. I have included heats, semifinals, and complete field event results where possible. Thanks to Brian Macumber (Division I-Rockford) for allowing me full access to the original results.

In addition, these results indicate which races were hand-timed and which were FAT. Only confirmed FAT performances are listed to the hundredth of a second. All others are rounded up to the nearest tenth. Wind readings are noted where they were taken (Division I only).
